Summary

I am a results-oriented Software Developer with a strong foundation in Python, Data Analysis, and ERP systems. I have a proven ability to automate business workflows and deliver data-driven solutions through Computer Vision and Machine Learning, achieving 92% model accuracy and optimizing database performance. My expertise in SQL analytics and technical tools drives operational efficiency

Experience

Classic Signage Pvt. Ltd

ERP Developer Intern

Jaipur

01/2026

Company specializing in custom signage solutions

- Collaborated with a team of 5 to design and deploy custom modules (Inventory, Sales, HR), streamlining cross-departmental business logic
- Optimized SQL queries and automated reporting, increasing processing speeds by 35% and reducing data entry errors by 50%
- Integrated manufacturing workflows into the ERP, improving real-time production tracking and operational ROI

Cyber Instant Pvt. Ltd

AI/ML Intern

Indore

07/2025 - 08/2025

Company focused on AI and Machine Learning solutions

- Built a real-time Face Recognition Attendance System using OpenCV and Dlib, fully automating the employee check-in process
- Optimized facial embedding algorithms to achieve 92% accuracy with a recognition latency of under 200ms
- Integrated the engine with SQL databases to automate attendance logging, timestamps, and real-time reporting

Projects

K2(Kharcha Khabar) - Expense Tracker Web Application

- Developed a web-based expense tracking application to solve the problem of manual expense management and overspending.
- Implemented features to record, categorize, and manage daily expenses for improved financial organization.
- Built the backend using Python Flask and integrated a MySQL database for secure data storage and retrieval.
- Generated expense reports and basic visualizations to help users analyze spending patterns.
- Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript

IPL Cricket Data Analysis Project

- Performed comprehensive Exploratory Data Analysis on 12 years of IPL data (2008-2020)
- Analyzed performance metrics for 500+ players across 8 teams and 60+ venues
- Created 15+ interactive visualizations showcasing player statistics and team performance trends
- Identified key performance indicators including top run scorers, wicket-takers, and win ratios
- Generated actionable insights on venue advantages and team strategies using statistical modeling

Education

Medicaps University

Bachelor of Technology

Indore

01/2022 - 05/2026

Skills

ERP, Python, Gmail, SQL, OpenCV, SQLite, Pandas, Numpy, Matplotlib, DBeaver, GitHub, Visual Studio Code, Postman, Linux, Unix, Shell Scripting, Google Analytics Blueprint
