SUMMARY

Computer Science graduate (B.Tech, 2026) with hands-on production experience in ERP development and applied machine learning. Deployed custom ERPNext modules used daily across departments at a live company, built a real-time face recognition system achieving 92% accuracy at <200ms latency, and shipped a live, test-covered full-stack finance web app. Strong in Python, SQL optimization, and turning manual business workflows into automated systems.

EXPERIENCE

ERP Developer Intern — Classic Signage Pvt. Ltd, Jaipur

Jan 2026 – Present

- Designed and deployed custom ERPNext modules (Inventory, Sales, HR) with a team of 5, streamlining cross-departmental business logic used in production daily
- Optimized SQL queries and automated reporting pipelines, increasing processing speed by 35% and reducing data entry errors by 50%
- Integrated manufacturing workflows into the ERP for real-time production tracking and improved operational ROI

AI / ML Intern — Cyber Instant Pvt. Ltd, Indore

Jul 2025 – Aug 2025

- Built a real-time Face Recognition Attendance System using OpenCV and Dlib, fully automating the employee check-in process
- Optimized facial embedding algorithms to achieve 92% recognition accuracy with latency under 200ms
- Integrated the recognition engine with SQL databases for automated attendance logging, timestamps, and live reporting

PROJECTS

K2 (Kharcha Khabar) — Expense Tracker Web App

Flask • PostgreSQL • pytest

- Built and deployed a full-stack expense tracker live on Render with automated GitHub-based deployments — PostgreSQL in production, MySQL locally ([Live Demo](#) | [GitHub](#))
- Implemented bcrypt-hashed authentication, environment-based secrets, and parameterized queries to prevent SQL injection
- Developed recurring transactions with month-end-safe date logic, monthly budget alerts, server-side search/filter/pagination, and CSV/PDF reports
- Wrote a 34-test pytest suite and shipped 11 versioned releases with tagged GitHub changelogs

IPL Cricket Data Analysis

Pandas • NumPy • Matplotlib

- Exploratory data analysis on 12 years of IPL data (2008–2020): 500+ players, 8 teams, 60+ venues
- Created 15+ visualizations and derived insights on top performers, venue advantages, and team strategies using statistical modeling

SKILLS

Languages: Python, SQL, JavaScript, Shell Scripting, HTML/CSS

Data & ML: Pandas, NumPy, Matplotlib, OpenCV, Dlib

ERP & Backend: ERPNext, Frappe, Flask, MySQL, PostgreSQL, MariaDB, SQLite

Tools: Git/GitHub, Linux, VS Code, DBeaver, Postman, pytest, Render

EDUCATION

B.Tech — Computer Science & Engineering

2022 – 2026

Medicaps University, Indore
